

Safety Data Sheet according to JIS Z 7253 : 2019 Issue date: 12/16/2008 Revision date: 3/28/2025

Version: 3.7

## 1. Chemical product and company identification

Substance name : OLFINE E1010

#### Recommended use of the chemical and restrictions on use

Recommended use : Additive

Restrictions on use

: General industrial use

#### **Company information**

Nissin Chemical Industry Co., Ltd. 100-0004 Japan Shin Otemachi Building, 2-2-1 Otemachi, Chiyoda-ku, Tokyo T +81-3-6262-0276 - F +81-3-6262-0277

## 2. Hazards identification

### **GHS** classification

| Physical hazards | Explosives                                                                     | classification not possible |
|------------------|--------------------------------------------------------------------------------|-----------------------------|
|                  | Flammable gases                                                                | No classification           |
|                  | Aerosol                                                                        | classification not possible |
|                  | Oxidizing gases                                                                | No classification           |
|                  | Gases under pressure                                                           | No classification           |
|                  | Flammable liquids                                                              | No classification           |
|                  | Flammable solids                                                               | No classification           |
|                  | Self-reactive substances and mixtures                                          | classification not possible |
|                  | Pyrophoric liquids                                                             | classification not possible |
|                  | Pyrophoric solids                                                              | No classification           |
|                  | Self-heating substances and mixtures                                           | classification not possible |
|                  | Substances and mixtures which<br>in contact with water emit<br>flammable gases | classification not possible |
|                  | Oxidizing liquids                                                              | classification not possible |
|                  | Oxidizing solids                                                               | No classification           |
|                  | Organic peroxides                                                              | classification not possible |
|                  | Corrosive to metals                                                            | classification not possible |
|                  | Desensitized explosives                                                        | classification not possible |
| Health hazards   | Acute toxicity (oral)                                                          | classification not possible |
|                  | Acute toxicity (dermal)                                                        | classification not possible |

|                          | Acute toxicity (inhalation:gas)                                 | classification not possible                                                                                                        |
|--------------------------|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
|                          | Acute toxicity                                                  | classification not possible                                                                                                        |
|                          | (inhalation:vapours)                                            | ale a sife and the second as a site la                                                                                             |
|                          | Acute toxicity<br>(inhalation:dust/mist)                        | classification not possible                                                                                                        |
|                          | Skin corrosion/irritation                                       | classification not possible                                                                                                        |

## 4. First aid measures

### First aid measures

| First-aid measures general               | : | If you feel unwell, seek medical advice (show the label where possible). Move out of dangerous area.Take off contaminated clothing and shoes immediately.Never give anything by mouth to an unconscious person.                                |
|------------------------------------------|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| First-aid measures after inhalation      | : | Remove the sufferers to fresh air places immediately. If breathing has stopped or is labored, give artificial respiration, and get medical advices.                                                                                            |
| First-aid measures after skin<br>contact | : | Take off contaminated clothes, shoes and socks. And wash sticking<br>parts off with soap and plenty of water. If the external changes<br>are observed or the symptoms such as irritation or itchy appears,<br>get medical advices immediately. |
| First-aid measures after eye contact     | : | Rinse immediately inner side of eyelid with plenty of water more<br>than 20 minutes. Remove the contact lenses if possible. Get<br>medical advices.                                                                                            |
|                                          |   | If eye irritation persists: Get medical advice/attention.                                                                                                                                                                                      |
| First-aid measures after ingestion       | : | Rinse mouth thoroughly with water and get medical attention immediately.                                                                                                                                                                       |
|                                          |   | Never give anything through mouth to a patient if he is<br>unconscious. Turn a patient's head to the side for preventing<br>suffocation by vomit.                                                                                              |

# 5. Fire fighting measures

| Suitable extinguishing media                     | : | Water mist, Alcohol-resistant foam, Dry chemical, Carbon dioxide (CO2), Dry sand                                     |
|--------------------------------------------------|---|----------------------------------------------------------------------------------------------------------------------|
| Unsuitable extinguishing media                   | : | Nothing in particular                                                                                                |
| Fire hazard                                      |   |                                                                                                                      |
| Fire hazard                                      | : | Under fire conditions, hazardous fumes or gas may be present.                                                        |
| Hazardous decomposition products in case of fire | : | The hazardous gasses such as carbon mono- and di-oxide and aldehyde group are generated at the Product's combustion. |
| Firefighting instructions                        |   |                                                                                                                      |
| Firefighting instructions                        | : | Cut off ignition sources to a fire origin and fight a fire employing a suitable fire extinguishing agent.            |
|                                                  |   | Cool by water spray around the fire site to prevent the fire extension.                                              |
| Descend protection (Emorgone                     |   |                                                                                                                      |

## Personal protection (Emergency response)

| Personal protection (Emergency response) | : | As gasses such as carbon dioxide, carbon monoxide, smoke are generated by high temperature at fire, wear a self-contained breathing apparatus, etc.                                                                                                                                                                                                                                                                                                                                               |
|------------------------------------------|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protection during firefighting           | : | In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.                                                                                                                                                                                                                                                                                                                                                                                                 |
| Other information                        | : | Standard procedure for chemical fires. Use extinguishing measures<br>that are appropriate to local circumstances and the surrounding<br>environment. In the event of fire and/or explosion do not breathe<br>fumes. Use water spray to cool unopened containers. Collect<br>contaminated fire extinguishing water separately. This must not<br>be discharged into drains. Fire residues and contaminated fire<br>extinguishing water must be disposed of in accordance with local<br>regulations. |

## 6. Accidental release measures

### Personal Precautions, Protective Equipment and Emergency Procedures

| General measures         | : | Clear off ignition sources and work from windward.                                                                                                                                                 |
|--------------------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |   | Wear suitable protective goggles, boots, gloves, body suits to avoid contact with droplet, etc and inhalation of mist, gas, etc.                                                                   |
| For emergency responders |   |                                                                                                                                                                                                    |
| Protective equipment     | : | Wear suitable protective tools such as goggles, boots, gloves,<br>body suits and a self-contained breathing apparatus according to<br>circumstances to avoid inhalation of and direct contact with |

|                                                | materials in question.                                                                                                                                                               |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Emergency procedures                           | : Clear off all of ignition sources immediately.                                                                                                                                     |
|                                                | Work from windward.                                                                                                                                                                  |
|                                                | Stop release.                                                                                                                                                                        |
| Environmental precautions                      |                                                                                                                                                                                      |
| Environmental precautions                      | : Take care that the released Products do not inflow into the water-<br>courses nor dirty water flows out to the environment.                                                        |
| Methods and Equipment for Co                   | ontainment and Cleaning up                                                                                                                                                           |
| For containment                                | : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).Keep in suitable, closed containers for disposal.                            |
| Methods for cleaning up                        | : When the releasing materials are small, cover with dry sand, dirt, sawdust and/or the like, rake up with shovels or brooms and recover into the containers being stoppled tightly. |
|                                                | When the releasing materials are large, vacuum and recover with a pump, etc.                                                                                                         |
| Prevention Measures for<br>Secondary Accidents | : Remove immediately all ignition source and prepare fire extinguish agents. Use safe tools which do not spark.                                                                      |
| 7. Handling and storag                         | e                                                                                                                                                                                    |
|                                                |                                                                                                                                                                                      |

#### Technical measures : Emergency showers and eye wash stations should be readily accessible. Take precautionary measures aginst electrostatic discharge. Open flames prohibited. Precautions for safe handling : Comply with practice rules established by the Government. As the Product has fear of precipitating or solidifying under low temperature(not exceeding 15°C), the Product is applied after warming, melting and stirring well in the case. Prevents handling of : Wear suitable personal protecting tools, if there are dangers of incompatible substances or inhalation of vapor and mist or contact to skin or eye(s). mixtures : Use in well-ventilated areas. Local and general ventilation Storage Storage conditions : Store with a tight stopper at cool and dark places. Material used in : Keep oil tins dry because oil tins packaging/containers may form rust by wet with water and so on. Technical measures : Store the Product at a well ventilated place where is isolated from thermal sources and strong oxidizers. Incompatible materials : Strong oxidizers (perchlorates, nitrates, peroxides). Reactive

metals. (sodium, calcium, zinc, etc.). Dehydrating agent.

# 8. Exposure controls / Personal protection equipment

| Appropriate engineering controls     | : Install sufficient general ventilators and local exhaust equipments, Express<br>the place clearly where safety shower(s) and hand and eye washer(s) are<br>equipped, Applied tools and equipments should be static charge prevention<br>style explosion-proof.                                                        |  |  |
| Protective equipment                 |                                                                                                                                                                                                                                                                                                                         |  |  |
| Materials for protective clothing    | : Use personal protective equipment against chemicals depending on<br>the concentration and quantity of the hazardous substance and<br>specific to place of work. For special applications, we recommend<br>clarifying the resistance to chemicals of the aforementioned<br>protective equipment with the manufacturer. |  |  |
| Respiratory protection               | : Use an air respirator at an emergency, It is needless under normal conditions at well ventilated place.                                                                                                                                                                                                               |  |  |
| Hand protection                      | : Wear protective gloves. (Neoprene Nitrile rubber)                                                                                                                                                                                                                                                                     |  |  |
| Eye protection                       | : goggles style protective glasses                                                                                                                                                                                                                                                                                      |  |  |
| Skin and body protection             | : protective clothing, Choose appropriate protective clothes according to the concentration of the dangerous substance and the work circumstance.                                                                                                                                                                       |  |  |
| Environmental exposure<br>controls   | : Do not flush into surface water or sanitary sewer system. Prevent<br>further leakage or spillage if safe to do so. If the product<br>contaminates rivers and lakes or drains inform respective<br>authorities. Avoid release to the environment. Refer to special                                                     |  |  |

instructions/ Safety data sheets.

## 9. Physical and chemical properties

| Physical state | : | Liquid                          |
|----------------|---|---------------------------------|
| Colour         | : | Light yellow $\sim$ Light brown |
| Odour          | : | characteristic odor             |
| рН             | : | 8.5 - 9.5                       |
| Melting point  | : | No data available               |
| Freezing point | : | No data available               |
| Boiling point  | : | No data available               |

| Flash point               | : | 228 °C (Cleveland open-cup test) |
|---------------------------|---|----------------------------------|
| Auto-ignition temperature | : | No data available                |
| Decomposition temperature | : | No data available                |
| Flammability              | : | No data available                |
| Vapour pressure           | : | No data available                |
| Relative density          | : | 1.03 25℃                         |
| Density                   | : | No data available                |
| Relative gas density      | : | No data available                |
| Solubility                | : | Soluble in water                 |
| Partition coefficient n-  | : | No data available                |
| octanol/water (Log Pow)   |   |                                  |
| Explosive limits (vol %)  | : | No data available                |
| Viscosity, dynamic        | : | 130 – 140 mPa·s                  |
| Viscosity, kinematic      | : | No data available                |
| Particle size             | : | No data available                |
|                           |   |                                  |

# 10. Stability and reactivity

| Reactivity                            | : | No data available                                                                                                                                                                                                          |
|---------------------------------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical stability                    | : | Prevent high temperature atmosphere, by which the degradation of the product is accelerated.                                                                                                                               |
| Possibility of hazardous<br>reactions | : | In case of mix and contact with strong oxidizer, it may cause hazards such as fire or explosion.                                                                                                                           |
| Conditions to avoid                   | : | Heat. Fire                                                                                                                                                                                                                 |
| Incompatible materials                | : | No information                                                                                                                                                                                                             |
| Hazardous decomposition<br>products   | : | The hazardous gasses such as carbon mono- and di-oxide and<br>aldehyde group are generated at the Product's combustion. Heating<br>above 65 C in the presence of strong base can produce flammable<br>hydrocarbon residue. |

# 11. Toxicological information

| Acute toxicity (oral)         | : | (as a product) | No data available |
|-------------------------------|---|----------------|-------------------|
| Acute toxicity (dermal)       | : | (as a product) | No data available |
| Acute toxicity (gas) -        | : | (as a product) | No data available |
| Description                   |   |                |                   |
| Acute toxicity (vapour) -     | : | (as a product) | No data available |
| Description                   |   |                |                   |
| Acute toxicity (dust, mist) - | : | (as a product) | No data available |
| Description                   |   |                |                   |
| Acute toxicity (mist) -       | : | (as a product) | No data available |
| Description                   |   |                |                   |

| Skin corrosion/irritation                                          | : | (as a product)                                     | No data available                                                                                                 |
|--------------------------------------------------------------------|---|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Serious eye damage/irritation                                      | : | (as a product)                                     | This product is correspond to Serius eye damage /eye irritation Category 1 of GHS from result of similar product. |
| Respiratory sensitization                                          | : | (as a product)                                     | No data available                                                                                                 |
| Skin sensitization                                                 | : | (as a product)                                     | No data available                                                                                                 |
| Germ cell mutagenicity<br>Carcinogenicity<br>Reproductive toxicity | : | (as a product)<br>(as a product)<br>(as a product) | No data available<br>No data available<br>No data available                                                       |
| STOT-single exposure                                               |   | (as a product)                                     | No data available                                                                                                 |
| STOT-repeated exposure                                             | : | (as a product)                                     | No data available                                                                                                 |
| Aspiration hazard                                                  | : | (as a product)                                     | No data available                                                                                                 |

# 12. Ecological information

| Ecotoxicity                                                     |   |                |                   |
|-----------------------------------------------------------------|---|----------------|-------------------|
| Hazardous to the aquatic<br>environment, short-term<br>(acute)  | : | (as a product) | No data available |
| Hazardous to the aquatic<br>environment, long-term<br>(chronic) | : | (as a product) | No data available |
| Persistence and degradability                                   |   |                |                   |
| Persistence and degradability                                   | : | (as a product) | No information    |
| Bioaccumulative potential                                       |   |                |                   |
| Bioaccumulative potential                                       | : | (as a product) | No information    |
| Partition coefficient n-<br>octanol/water (Log Pow)             | : | (as a product) | No data available |
| Mobility in soil                                                |   |                |                   |
| Mobility in soil                                                | : | (as a product) | No data available |
| Partition coefficient n-<br>octanol/water (Log Pow)             | : | (as a product) | No data available |
|                                                                 |   |                |                   |

### Hazardous to the ozone layer

| Ozone                 | : | (as a product)      | No data available |
|-----------------------|---|---------------------|-------------------|
| Other adverse effects | : | No additional infor | mation available  |

## **13.** Disposal considerations

| Ecological waste information         | : | Farm out to professional disposal treating traders in compliance with requirements of the nation and local governments.                                                        |
|--------------------------------------|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Contaminated container and packaging | : | Farm out disposal of the contents and packaging materials to<br>professional disposal treating traders in compliance with<br>requirements of the nation and local governments. |
|                                      |   | In case of disposal of empty container, dispose after complete removal in the container.                                                                                       |

## 14. Transport information

### **International Regulations**

#### Transport by sea(IMDG)

| UN-No. (IMDG)               | : Not applicable |
|-----------------------------|------------------|
| Proper Shipping Name (IMDG) | Not applicable   |
| Packing group (IMDG)        | : Not applicable |
| Transport hazard class(es)  | : Not applicable |
| (IMDG)                      |                  |

### Air transport(IATA)

| UN-No. (IATA)               | : | Not applicable |
|-----------------------------|---|----------------|
| Proper Shipping Name (IATA) | : | Not applicable |
| Packing group (IATA)        | : | Not applicable |
| Transport hazard class(es)  | : | Not applicable |
| (IATA)                      |   |                |

### **Regulations in Japan**

| Regulatory information by sea | : | Nonhazardous material                  |
|-------------------------------|---|----------------------------------------|
| Regulatory information by air | : | Nonhazardous material                  |
| Other information             | : | No supplementary information available |

## 15. Regulatory information

REACH SVHC

: Contains substance(s) listed on the REACH Candidate List < 0.1% or SCL.

## 16. Other information

| Data sources      | : | Ref. 1. "Safety Data Sheet" by Raw Material Manufacturers.<br>2.GHS Sixth Revised Edition. 3.NITE GHS Results of the<br>Classification.                                                                                                                                                                                                                                                                          |
|-------------------|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Other information | : | The Products was developed for general industries' use. When<br>applying to specific uses, it is hoped to confirm its safety by<br>yourselves prior to the use. The description of this SDS is<br>based upon materials, information and data which can be<br>procured at present. However, we do not warrant any<br>guarantee regarding the contents, physical and chemical<br>properties, hazards and the like. |

DISCLAIMER OF LIABILITY The information in this SDS was obtained from sources which we believe are reliable.
