2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture.

Additional Labelling:

EUH210 Safety data sheet available on request.

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Version	Revision Date:	Date of first issue:
1.5	25.02.2025	06.12.2016

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regu-lation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Dust contact with the eyes can lead to mechanical irritation. Contact with dust can cause mechanical irritation or drying of the skin. May form explosible dust-air mixture if dispersed.

SECTION 3: Composition/information on ingredients

3.1 Substances

Substance name : Vi

: Vinyl chloride-Vinyl acetate based copolymer

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice	 In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice.
Protection of first-aiders	: First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists (see section 8).
If inhaled	: If inhaled, remove to fresh air. Get medical attention if symptoms occur.
In case of skin contact	: Wash with water and soap. Get medical attention if symptoms occur.
In case of eye contact	: If in eyes, rinse well with water. Get medical attention if irritation develops and persists.
If swallowed	: If swallowed, DO NOT induce vomiting. Get medical attention if symptoms occur. Rinse mouth thoroughly with water.

4.2 Most important symptoms and effects, both acute and delayed

Risks :	Contact with dust can cause mechanical irritation or drying of
	the skin.
	Dust contact with the eyes can lead to mechanical irritation.

4.3 Indication of any immediate medical attention and special treatment needed

	Revision Date: :5.02.2025	Date of first issue: 06.12.2016	
Treatment	: Treat symptomatica	: Treat symptomatically and supportively.	
SECTION 5: Firefighting mea	sures		
5.1 Extinguishing media			
Suitable extinguishing media	: Water spray Alcohol-resistant for Carbon dioxide(CO Dry chemical		
Unsuitable extinguishing med	ia : High volume water	jet	
5.2 Special hazards arising from	the substance or mixt	ure	
Specific hazards during fire- fighting	concentrations, and potential dust explo Do not use a solid fire.	ust; fine ust dispersed in air in sufficient d in the presence of an ignition source is a osion hazard. water stream as it may scatter and spread ustion products may be a hazard to health.	
Hazardous combustion prod- ucts	: Carbon oxides Chlorine compound	ls	
5.3 Advice for firefighters			
Special protective equipment for firefighters	: In the event of fire Use personal prote	, wear self-contained breathing apparatu ctive equipment.	
Specific extinguishing meth- ods	cumstances and th Use water spray to	neasures that are appropriate to local cir- e surrounding environment. cool unopened containers. ed containers from fire area if it is safe to d	

Personal precautions	:	Use personal protective equipment.
		Follow safe handling advice (see section 7) and personal protective equipment recommendations (see section 8).
6.2 Environmental precautions		
Environmental precautions	-	Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and material for containment and cleaning up

Version	Revision Date:	Date of first issue:
1.5	25.02.2025	06.12.2016
Methods for cleaning up	with compressed air). Dust deposits should not be a es, as these may form an exp leased into the atmosphere ir Local or national regulations posal of this material, as well employed in the cleanup of re mine which regulations are a	air (i.e., clearing dust surfaces allowed to accumulate on surfac- blosive mixture if they are re- a sufficient concentration. may apply to releases and dis- as those materials and items eleases. You will need to deter- oplicable. DS provide information regarding

6.4 Reference to other sections

See sections: 7, 8, 11, 12 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Technical measures	:	Static electricity may accumulate and ignite suspended dust causing an explosion. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.
Local/Total ventilation	:	Use only with adequate ventilation.
Advice on safe handling	:	Do not breathe dust. Do not swallow. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Handle in accordance with good industrial hygiene and safety practice. Minimize dust generation and accumulation. Keep container closed when not in use. Keep away from heat and sources of ignition. Take care to prevent spills, waste and minimize release to the environment.
Hygiene measures	:	If exposure to chemical is likely during typical use, provide eye flushing systems and safety showers close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers	: Store in a well-ventilated place. Keep cool. Keep in properly labelled containers. Store in accordance with the particular national regulations.
Advice on common storage	: Do not store with the following product types: Strong oxidizing agents

Version	Revision Date:	Date of first issue:	
1.5	25.02.2025	06.12.2016	
7.3 Specific end use(s)	23.02.2023	00.12.2010	

7.3 Specific end use(s)

Specific use(s)

: No data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Contains no substances with occupational exposure limit values.

8.2 Exposure controls

Engineering measures

Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations. Apply measures to prevent dust explosions. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Eye protection :	Wear the following personal protective equipment: Safety goggles Equipment should conform to MSA EN 166
Hand protection	
Material :	Chemical-resistant gloves
Remarks :	For prolonged or repeated contact use protective gloves. Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous sub- stance and specific to place of work. Breakthrough time is not determined for the product. Change gloves often! For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer. Wash hands before breaks and at the end of workday.
Skin and body protection :	Select appropriate protective clothing based on chemical resistance data and an assessment of the local exposure potential. Skin contact must be avoided by using impervious protective clothing (gloves, aprons, boots, etc).
Respiratory protection :	If adequate local exhaust ventilation is not available or expo- sure assessment demonstrates exposures outside the rec- ommended guidelines, use respiratory protection. Equipment should conform to MSA EN 14387
Filter type :	Combined particulates and organic vapour type (A-P)

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

	Revision Date: 25.02.2025	Date of first issue: 06.12.2016
Physical state	: powder	
Colour	: white	
Odour	: odourless	
Odour Threshold	: No data available	
рН	: No data available	
Melting point/freezing point	: No data available	
Initial boiling point and boilin range	g : No data available	
Flash point	: Not applicable	
Flammability (solid, gas)	: Not classified as a	flammability hazard
Upper explosion limit / Upper flammability limit	: No data available	
Lower explosion limit / Lower flammability limit	: No data available	
Vapour pressure	: Not applicable	
Relative vapour density	: Not applicable	
Density	: 1.4 g/cm3	
Solubility(ies) Water solubility	: insoluble	
Solubility in other solvent	s : soluble Solvent: Ketones	
	soluble Solvent: Esters	
	soluble Solvent: Nitrobenz	ene
	insoluble Solvent: Mineral oi	ls
	insoluble Solvent: Alcohol	

Version 1.5	Revision Date: 25.02.2025	Date of first issue: 06.12.2016
Partition coefficient: n-octan	ol/water: No data available	
Auto-ignition temperature	: No data available	
Decomposition temperature	e : No data available	
Viscosity Viscosity, Kinematic	: Not applicable	
Particle characteristics Particle size	: No data available	
9.2 Other information		
Explosives	: Not explosive	
Oxidizing properties	: The substance or m	ixture is not classified as oxidizing
Evaporation rate	: Not applicable	

SECTION 10: Stability and reactivity

10.1 Reactivity

Not classified as a reactivity hazard.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reac	tions	
Hazardous reactions	: Dust can form an explosive mixture in a Can react with strong oxidizing agents.	ir.
10.4 Conditions to avoid		
Conditions to avoid	: Avoid dust formation.	
10.5 Incompatible materials		
Materials to avoid	: Oxidizing agents	

10.6 Hazardous decomposition products

No hazardous decomposition products are known.

SECTION 11: Toxicological information

11.1 Information on toxicological effects Information on likely routes of : Inhalation

iniornation on likely routes of	•	Innalation
exposure		Skin contact
		Ingestion
		Eye contact

No data available				

13.1 Waste treatment methods

Product	 Dispose of in accordance with local regulations. According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user, preferably in discussion with the waste disposal authorities.
Contaminated packaging	 Empty containers should be taken to an approved waste handling site for recycling or disposal. If not otherwise specified: Dispose of as unused product.

SECTION 14: Transport information

14.1 UN number

Not regulated as a dangerous good
