

# SILFACE SAG503A

**Nissin Chemical Industry Co.,  
Ltd.**

5-13, Uchikanda 1-chome, Chiyoda-ku,  
Tokyo, Japan  
Tel: +81-3-3295-3931  
Fax: +81-3-3295-3929

Revision date:2020/10/29  
Date of enactment:2007/04/18  
Version:3.2

---

## SAFETY DATA SHEET

### 1. Chemical product and company identification

Trade name : SILFACE SAG503A  
Substance name : Surfactant composition  
Company/undertaking : Nissin Chemical Industry Co., Ltd.  
identification  
Zip code : 101-0047  
Street : 5-13, Uchikanda 1-chome, Chiyoda-ku, Tokyo, Japan  
Tel : +81-3-3295-3931  
Fax : +81-3-3295-3929  
Department name : Quality Assurance Group/Environmental & Quality Management  
Division  
Tel : +81-778-22-9998  
Fax : +81-778-22-9998

### 2. Hazards identification

#### GHS classification

Physical hazards : Explosive / Classification not possible  
: Flammable gases / Not applicable  
: Flammable aerosol / Classification not possible  
: Oxidising gases / Not applicable  
: Gases under pressure / Not applicable  
: Flammable liquids / Not classified  
: Flammable solids / Not applicable  
: Self-reactive substances and mixtures / Classification not possible  
: Pyrophoric liquids / Classification not possible  
: Pyrophoric solids / Not applicable  
: Self-heating substances and mixtures / Classification not possible  
: Substances and mixtures which in contact with water emit  
flammable gases / Classification not possible  
: Oxidising liquids / Classification not possible  
: Oxidising solids / Not applicable

- : Organic peroxide / Classification not possible
- : Corrosive to metals / Classification not possible
- Health hazards : Acute toxicity (oral) / Classification not possible
- : Acute toxicity (dermal) / Classification not possible
- : Acute toxicity (inhalation:gas) / Classification not possible
- : Acute toxicity (inhalation:vapour) / Classification not possible
- : Acute toxicity (inhalation:dust,mist) / Classification not possible
- : Skin corrosion/irritation / Classification not possible
- : Serious eye damage/eye irritation / Classification not possible
- : Respiratory sensitisation / Classification not possible
- : Skin sensitisation / Classification not possible
- : Germ cell mutagenicity / Classification not possible
- : Carcinogenicity / Classification not possible
- : Reproductive toxicity / Classification not possible
- : Specific target organ toxicity (single exposure) / Classification not possible
- : Specific target organ toxicity (repeated exposure) / Classification not possible
- : Aspiration hazard / Classification not possible
- Environmental hazards : Hazardous to the aquatic environment - Acute Hazard / Classification not possible
- : Hazardous to the aquatic environment - Chronic Hazard / Classification not possible
- : Hazardous to the ozone layer / Classification not possible
- [Prevention precautionary statements] : Wear protective gloves, protective clothing, eye protection, face protection. (P280)
- [Response Precautionary Statements] : If on skin, if in eyes, if swallowed, and if inhaled, immediately call a doctor. (P310)  
Get medical advice/attention if you feel unwell. (P314)
- [Storage precautionary statements] : Store in a well-ventilated place. Keep cool. (P403+P235)
- [Disposal precautionary statements] : Dispose of contents/container in accordance with local/regional/national/international regulations. (P501)

### 3. Composition/information on ingredients

Generic name : Surfactant composition

Name	Concentration	Kanpo number		CAS No
		CSCL No	ISHL No	
Surfactant A	100%	Listed	Existing	Listed

#### 4. First aid measures

- First-aid measures general : If you feel unwell, seek medical advice (show the label where possible). Move out of dangerous area. Take off contaminated clothing and shoes immediately. Never give anything by mouth to an unconscious person.
- First-aid measures after inhalation : Remove the sufferers to fresh air places immediately. If breathing has stopped or is labored, give artificial respiration, and get medical advices.
- First-aid measures after skin contact : Take off contaminated clothes, shoes and socks. And wash sticking parts off with soap and plenty of water. If the external changes are observed or the symptoms such as irritation or itchy appears, get medical advices immediately.
- First-aid measures after eye contact : Rinse immediately inner side of eyelid with plenty of water more than 20 minutes. Remove the contact lenses if possible. Get medical advices, If eye irritation persists: Get medical advice/attention.
- First-aid measures after ingestion : Rinse mouth thoroughly with water and get medical attention immediately, Never give anything through mouth to a patient if he is unconscious. Turn a patient's head to the side for preventing suffocation by vomit.

#### 5. Fire fighting measures

- Suitable extinguishing media : Water mist, Alcohol-resistant foam, Dry chemical, Carbon dioxide (CO<sub>2</sub>)
- Unsuitable extinguishing media : Water.
- Personal protection (Emergency response) : As gasses such as carbon dioxide, carbon monoxide, smoke are generated by high temperature at fire, wear a self-contained breathing apparatus, etc.
- Protection during firefighting : In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.
- Other information : Standard procedure for chemical fires. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. In the event of fire and/or explosion do not breathe fumes. Use water spray to cool unopened containers. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

#### 6. Accidental release measures

##### Personal Precautions, Protective Equipment and Emergency Procedures

- General measures : Clear off ignition sources and work from windward  
Wear suitable protective goggles, boots, gloves, body suits to avoid contact with droplet, etc and inhalation of mist, gas, etc.
- Environmental precautions : Take care that the released Products do not inflow into the water-courses nor dirty water flows out to the environment.

**Methods and Equipment for Containment and Cleaning up**

- For containment : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).Keep in suitable, closed containers for disposal.
- Methods for cleaning up : When the releasing materials are small, cover with dry sand, dirt, sawdust and/or the like, rake up with shovels or brooms and recover into the containers being stoppled tightly  
When the releasing materials are large, vacuum and recover with a pump, etc.

**7. Handling and storage**

**Handling**

- Technical measures : Emergency showers and eye wash stations should be readily accessible  
Take precautionary measures against electrostatic discharge.
- Precautions for safe handling : Comply with practice rules established by the Government  
As the Product has fear of precipitating or solidifying under low temperature(not exceeding 5°C), the Product is applied after warming, melting and stirring well in the case.
- Prevents handling of incompatible substances or mixtures : Wear suitable personal protecting tools, if there are dangers of inhalation of vapor and mist or contact to skin or eye(s).

**Storage precautionary statements**

- Storage conditions : Store with a tight stopper at cool and dark places.
- Technical measures : Store the Product at a well ventilated place where is isolated from thermal sources and strong oxidizers.
- Material used in packaging/containers : Keep oil tins dry because oil tins may form rust by wet with water and so on.
- Incompatible materials : Strong oxidizers (perchlorates, nitrates, peroxides),Reactive metals. (sodium,calcium, zinc, etc.),Dehydrating agent

**8. Exposure controls / Personal protection equipment**

- Japan administration level : No data available
- Exposure limits (JSOH) : No data available
- Exposure limits (ACGIH) : No data available
- Appropriate engineering : Install sufficient general ventilators and local exhaust equipments

controls	Express the place clearly where safety shower(s) and hand and eye washer(s) are equipped  Applied tools and equipments should be static charge prevention style explosion-proof.
Respiratory protection	: Use an air respirator at an emergency  It is needless under normal conditions at well ventilated place
Hand protection	: Wear protective gloves.(Neoprene Nitrile rubber)
Eye protection	: Protective glasses with side plates
Skin and body protection	: protective clothing  Choose appropriate protective clothes according to the concentration of the dangerous substance and the work circumstance
Materials for protective clothing	: Use personal protective equipment against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective equipment with the manufacturer.
Environmental exposure controls	: Do not flush into surface water or sanitary sewer system. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities. Avoid release to the environment. Refer to special instructions/ Safety data sheets.

## 9. Physical and chemical properties

Physical state	: Liquid
Appearance	: Liquid
Colour	: light yellow. clear
Melting point	: No data available
Boiling point	: No data available
Flash point	: 150 °C (Cleveland open-cup test)
Relative evaporation rate (butylacetate=1)	: No data available
Flammability (solid, gas)	: No data available
Explosive limits (g/m <sup>3</sup> )	: No data available
Explosive limits (vol %)	: No data available
Vapour pressure	: No data available
Relative vapour density at 20 °C	: No data available
Specific gravity density	: No data available
Log Pow	: No data available
Auto-ignition temperature	: No data available

Decomposition temperature : No data available  
Viscosity : 60 - 100 mm<sup>2</sup>/s

### 10. Stability and reactivity

Reactivity : Stable under normal conditions  
Chemical stability : Prevent high temperature atmosphere, by which the degradation of the product is accelerated.  
Possibility of hazardous reactions : In case of mix and contact with strong oxidizer, it may cause hazards such as fire or explosion.  
Conditions to avoid : Heat, Fire  
Incompatible materials : Strong oxidizer (perchlorates, nitrates, peroxides etc.), Materials reacted with hydroxyl compounds  
Hazardous decomposition products : The hazardous gasses such as carbon mono- and di-oxide and aldehyde group are generated at the Product's combustion.

### 11. Toxicological information

Acute toxicity (oral) - Description : No data available  
Acute toxicity (dermal) - Description : No data available  
Acute toxicity (gas) - Description : No data available  
Acute toxicity (vapour) - Description : No data available  
Acute toxicity (dust) - Description : No data available  
Acute toxicity (mist) - Description : No data available  
LC50 inhalation rat (mg/l) : No data available  
Skin corrosion/irritation - Description : No data available  
Serious eye damage/eye irritation - Description : No data available  
Germ cell mutagenicity - Description : No data available  
Carcinogenicity : No data available  
Reproductive toxicity - Description : No data available  
Specific target organ toxicity (single exposure) - Description : No data available  
Specific target organ toxicity : No data available

(repeated exposure) -

Description

Aspiration hazard - : No data available

Description

Other health hazard : No data available

## 12. Ecological information

Hazardous to Aquatic : No data available

Environment - Acute Hazard

Hazardous to Aquatic : No data available

Environment - Chronic

Hazard

Ecotoxicity : No data available

Fish Toxicity / Other Toxicity : No data available

Persistence and degradability : No data available

Chemical oxygen demand (COD) : No data available

Bioaccumulative potential : No data available

Ecology - soil : No data available

Other information : It should not be allowed for the product to be run into drains, water courses or the soil.

## 13. Disposal considerations

Waste treatment methods : In accordance with local and national regulations. Do not dispose of waste into sewer. This material and its container must be disposed of as hazardous waste. Do not dispose of together with household waste.

Ecology - waste materials : Farm out to professional disposal treating traders in compliance with requirements of the nation and local governments  
Thermal disposal. On this occasion, choose appropriate incineration facility because of silica powder preparation at incineration. And working staff guard by protection equipment like antidust mask.

Contaminated container and packaging : Farm out disposal of the contents and packaging materials to professional disposal treating traders in compliance with requirements of the nation and local governments  
In case of disposal of empty container, dispose after complete removal in the container.

## 14. Transport information

International Regulations

UN-No. : Not applicable

Class (UN) : Not applicable

Regulations in Japan

UN-No. : Not applicable

Class (UN) : Not applicable

Other information : At transportation, make sure of no leakage of packings, load the products without broken bags, falling, injury, etc., and prevent load collapses surely.

### 15. Regulatory information

Regulatory reference

Country name	Inventory List	Listed/Not listed	Country name	Inventory List	Listed/Not listed
USA	TSCA	Listed	Korea	KECI	Listed
EU	EINECS	Listed	EU	REACH	No-Registered
Canada	DSL	Listed	People's Republic of China	IECSC	Listed
Australia	AICS	Listed	Philippines	PICCS	Listed
New Zealand	NZIoC	Listed	Taiwan	ECN	Listed

The Nissin Chemical Company is not able to check up the regulatory information in regard to the substances in your country or region, therefore, we request this matter would be filled by your responsibility.

### 16. Other information

Data sources : Ref. 1.“Safety Data Sheet” by Raw Material Manufacturers. 2.GHS Fourth Revised Edition. 3.NITE GHS Results of the Classification

Other information : The Products was developed for general industries’ use. When applying to specific uses, it is hoped to confirm its safety by yourselves prior to the use. The description of this SDS is based upon materials, information and data which can be procured at present. However, we do not warrant any guarantee regarding the contents, physical and chemical properties, hazards and the like
